

Setting the Stage *for* Innovation

“Whether it’s helping a veteran, building parks and greenways, or providing community health services, we will continue to put people first.”

Message from the County Manager

Fiscal Year 2015 was another year of progress for Mecklenburg County in realizing an ambitious vision for our community and setting the standard for efficient, accountable and effective service delivery. This year, our organization continued to advance innovation by eliminating redundancies, creating conditions for optimum service delivery for County residents and investing in the development for our greatest asset, County employees. From our operations to our organizational culture, we are stronger today than we were one year ago.

The Mecklenburg County Annual Performance Report serves as an important update to the Board of County Commissioners, County residents, and employees on our long-term performance goals. This year continued to reflect the strong fiscal leadership of the Board of County Commissioners in balancing our community’s needs with the resources of our residents, as well as the fiduciary stewardship and innovation of County employees in maximizing efficiency, driving performance and delivering results for our community. Overall, we remain on track to achieve our long-term goals.

As we review the results of this report and move into the next fiscal year, I commit that as a public service organization Mecklenburg County will remain accountable and transparent in all the ways we touch residents’ lives every day. Whether it’s helping a veteran, building parks and greenways, or providing community health services, we will continue to put people first.

Mecklenburg County is laying the foundation for a strong and vibrant future.
